+ SUMMARY

I'm a dedicated individual with a passion for mobile app development and a solid grasp of programming fundamentals. Eager to launch my career as a Flutter Developer Intern, I'm committed to learning and adapting to new technologies. With a focus on Flutter, I aim to collaborate effectively, seek out best practices, and contribute to the design and execution of mobile applications at ShotCoder Tech, enhancing project success and adding value to the team.

+ EDUCATION

Bachelor of Science in Computer Science and Information Technology

Amrit Campus / Kathmandu / December, 2021 - Present

+ TRAINING/CERTIFICATION

Java

HackerRank / 2022

Proficient in core Java: OOP, I/O, JDBC, and essential libraries.

Weather App

Description:

Developed a cross-platform mobile application using Flutter and Dart to provide users with real-time weather updates. Integrated the OpenWeatherMap API to fetch weather data based on the user's location. Features include displaying current weather conditions, hourly forecasts.

Key Technologies: Flutter, Dart, OpenWeatherMap API

To-Do-List App

Description:

Created a To-Do List application using Flutter and implemented the BLoC architecture for state management. The app allows users to create, update, delete, and prioritize tasks. Utilized the BLoC pattern to separate business logic from the UI, providing a scalable and maintainable solution. Implemented features such as task filtering, sorting, and search functionality for an intuitive user experience.

Key Technologies: Flutter, Dart, BLoC

Ecommerce App

Description: Currently developing a comprehensive eCommerce application using Flutter and Dart. The app aims to provide users with a seamless shopping experience, including features such as product browsing, searching, filtering, ordering, and payment processing. Employing modern design principles and responsive layout to ensure compatibility across various devices. Integrating Firebase for backend services, including user authentication, database management, and cloud storage.

Key Technologies: Flutter, Dart, Firebase (Authentication, Firestore, Cloud Storage)
